Charts for Child Trends' Child Care Indicator

Figure 1
Percentage of Children, Birth through Age 4, with Employed Mothers, by Primary Type of Care Arrangement, 1985-2011

Figure 2

Percentage of School-Aged Children in Parental and Nonparental Care, by Age and Type of Care, 2010

Note: Some children participated in more than one type of nonparental care arrangement. Thus, details do not add to the total percentage of children in nonparental care.

Table 2 contains the data for this figure. Data from the Child Trends DataBank, U.S. Department of Education, National Center for Education Statistics, National Household Education Survey.
Figure 3: Primary Care Arrangements for Children Ages 0-4 with Employed Mothers, by Race and Hispanic Origin, 2011

Note: Some children participate in more than one type of nonparental care arrangement. Thus, percentages within non-Hispanic white group may not sum to 100.
