

## Provider Tips 1:1 Exit Counseling Sessions Senn High School STI Blitz

- Each provider will have a station behind a privacy screen.
- A traffic control volunteer will send students to you one by one as you're available.
- Students will be giving you a urine cup bag and label sheet.
- ***"Did you test today?"***

Yes!	Nope. "May I ask, why didn't you test today?"
Great, let's review some basic health information and allow me to answer any questions you may have today.	Common reasons: "I didn't have to pee," "I didn't feel comfortable with others around," "I'm not having sex."
Confirm name and DOB written on labels. <ul style="list-style-type: none"> <li>→ Add your last name.</li> <li>→ NP students, write FINCK on the labels (Beth's last name).</li> <li>→ Place one label on the urine cup, leave second label loose in bag.</li> </ul>	If they <b>do</b> want to test, offer returning at their lunch period, the next testing day, or at their f/u visit in 1 - 2 wks.  <i>*Put labels in a "shred" pile if student if did <b>NOT</b> provide urine.</i>
If bag feels "light," check cup to be sure there is enough urine. If not, then...	

### Minor Consents:

- Confirm that we have consent signed (check with roster at your station).
- Extra minor consents available at your station if needed.

### Paper Log (sample log enclosed):

- Paper logs **ONLY** on testing days. We'll chart in Centricity the following day. Rush NP students will not be charting in Centricity.
- This is a **BRIEF** encounter, gather basic info for the log and provide an opportunity for private questions, then on to the next student. If **LOTS** of questions, reassure them of the longer 1:1 time in 1 – 2 weeks.
- **IF** student is experiencing any symptoms concerning PID or epididymitis, consider bringing them into clinic the next day for exam and empiric treatment.
- Confirm cell phone is their personal # (leave blank if no cell, we will instead contact them by notes to class).
- Your paper logs are in the back of your packet.
- At periods throughout the day, Alyssa will make copies of completed logs for another PSS (who is adding these patients to our Centricity schedules).
- NP students will turn their logs in to Beth at the end of the testing day.

**F/U Appointments:** Reiterate that they'll be receiving an appt by text in 1 – 2 weeks.

**Condoms:** Offer a bag, resource cards.

**Exit:** Direct students to bleachers for birth control Q&A until class period ends.

### Urine Bags:

- Make piles on floor next to your station: one for empty cups that will be tossed, another in the boxes provided for MAs to package up. Don't run bags to lab station after each encounter, wait for several to accumulate.
- If student completed a label and is not testing, make a pile of those labels for shredding.

### Disclosure of Abuse or Assault:

- DCFS and behavioral health may need to get involved.
- Assess if student is safe to continue with the school day and find a time that works to further assess the situation.
- Notify another provider if you need to be pulled from the rotation of students to continue meeting 1:1 with this particular case.
- Students, please notify a provider (Beth, Jane, Pam, or Carly)
